north american
horticultural leadership

Sun Gro Horticulture is one of the most prominent North American horticultural companies, employing over 900 staff and serving customers worldwide.

Since its humble beginnings in 1929, it has become the leading supplier of soilless growing mixes to North America's leading greenhouse and nursery growers, shipping over 70,000 truckloads of product annually for professional and retail – consumer markets. The ingredients in our peat and bark-based mixes are developed by professional horticulturists and produced under the industry's highest quality standards.

Sun Gro products are made to exacting standards and conform to high product quality and performance criteria. We offer extensive testing and analytical services for water, media and tissue analysis as well as professional horticultural technical advice and resources for growers.

Developed by professional horticulturists and produced under the industry's highest quality standards, we offer over 100 professional and retail products.

sungro®
HORTICULTURE

the growing media company

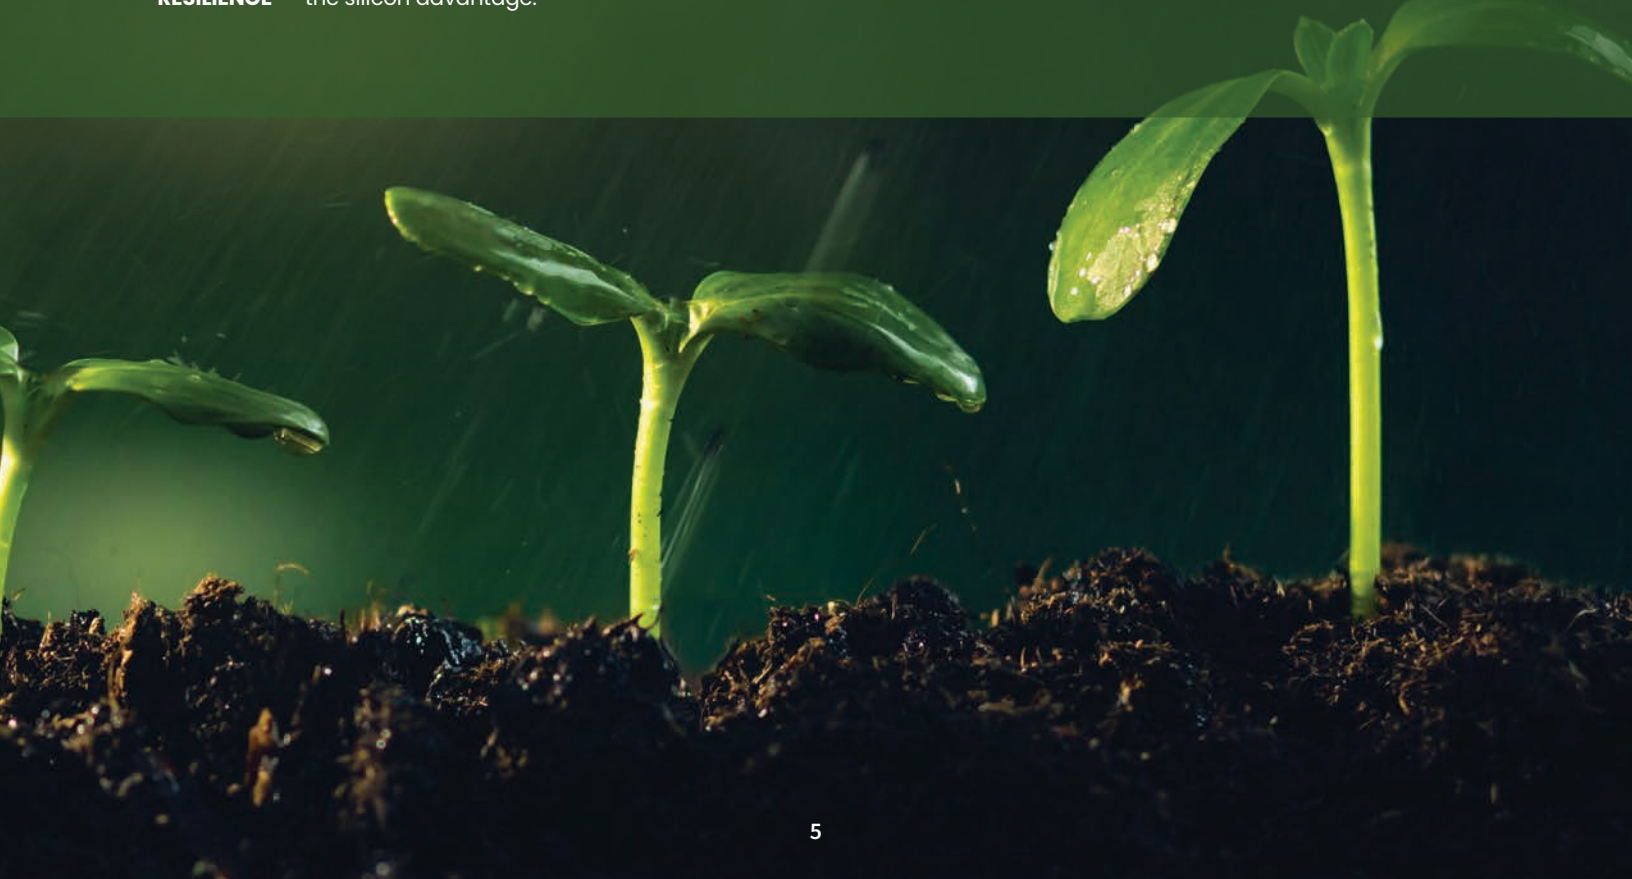

Sun Gro Horticulture is recognized as a leading force in North America for both professional and consumer soilless growing mixes.

When professional growers demand consistent performance, a reliable supply and the latest innovations in growing media, they turn to Sun Gro. As The Growing Media Company, we deliver more than just peat moss—we deliver expertly manufactured blends tailored to today's horticulture.

As part of this excellence, we are **committed to growing innovation and global ingredient diversity**, and are expanding into sourcing and providing a broader range of offerings. Our focus now extends beyond traditional mixes to encompass **specialized growing media** raw materials that are sourced both locally and globally. This expanded portfolio includes environmentally conscious options such as **Black Bear® biochar**, a climate conscious growing mix; **Pelemix®**, a coconut coir organic and eco-friendly cultivation option; local resources related to wood fiber; and **RESiLIENCE®** - the silicon advantage.

This means Sun Gro Horticulture's commitment to sustainability goes beyond product innovation and extends to the entire supply chain. Our dedication to responsible sourcing practices ensures that the raw materials for our growing mixes meet stringent environmental and ethical standards. By actively engaging with local and global suppliers, we aim to create a positive impact on the communities and ecosystems where these resources are derived. This holistic approach not only aligns with our values but also reinforces our position as a socially responsible industry leader. We believe that by fostering sustainability at every stage, from sourcing to the end product, we contribute to a better planet while providing our customers with quality growing solutions they can trust.

Commitment to Innovation and

Global Ingredient Diversity

- Bark
- Biochar
- Canadian Sphagnum Peat Moss

- Wood Fiber

from bog, to bag, to You.

Sun Gro® Horticulture is the leader in sustainable peat resources.

We endorse and support the Canadian Sphagnum Peat Moss Association's definition of sustainable peatland management as the "balanced stewardship of the environmental, social and economic values of Canada's renewable peatland resource."

"Committed to environmental sustainability and sustaining Canadian sphagnum peatlands"

Veriflora® Responsibly Managed Peatlands

The Canadian sphagnum peat moss in our products is extracted from bogs that are certified under the Veriflora® Responsibly Managed Peatlands program. This certification demonstrates our commitment to the application of good management principles in all aspects of sustainable development, including ecosystem protection, social engagement and product quality.

RESPONSIBLY MANAGED PEATLANDS
CERTIFIED
SCS GLOBAL SERVICES
VERIFLORA® PROGRAM

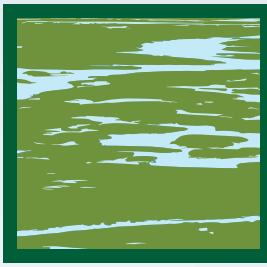

HOW BOGS WERE FORMED
Peat bogs were formed from melting glaciers. Plants grew and died, creating decomposed organic residue. Sphagnum peat moss holds nutrients in the soil.

INDUSTRY-LEADING HORTICULTURAL SCIENCE
Industry-leading science and R&D with Sun Gro's specialists.

THE SOURCE
Sun Gro sources peat moss in the 270 million acres of bogs in the northern wetlands of Canada. These bogs in Canada represent 25% of the world's total.

CUSTOMER CARE
- Solution Focused Team
- Innovative Order Entry & Delivery Management
- Superior Customer Care & Support

HOW WE HARVEST
The peatland is harrowed inches deep and vacuumed up. **THERE ARE ONLY 40–50 SUITABLE HARVEST DAYS PER YEAR.**

RESiLIENCE® the silicon advantage: Improves growth by providing more resistance to abiotic stress such as wilting, heavy metal toxicity and salt stress.

QUALITY OF THE HARVEST
A typical harvest **DELIVERS 75% PROFESSIONAL GRADE** (closer to the surface) and 25% consumer retail peat moss.

TRUCKLOADS
Sun Gro trucks travel coast to coast and everywhere in between to deliver quality products.

THE RIGHT BOG
Bogs are chosen for harvest by their suitability for restoration. **THEY CAN BE RETURNED TO NEAR-ORIGINAL STATE IN AS LITTLE AS 10–15 YEARS.**

COMMERCIAL GROWING LEADER
The majority of North America's commercial growers rely on Sun Gro for high quality peat moss and peat-based growing media.

CONSUMER & PROFESSIONAL
Since 1929, Sun Gro has created the highest quality, most advanced mixes and peat products for consumers and professional growers.

EVERY GARDENING NEED
Our many brands cover every gardening need—from general gardening to container-specific planting to specialty plants and foods.

ACROSS NORTH AMERICA
Sun Gro operates **OVER 20 PRODUCTION FACILITIES** across North America, where peat is processed with and without other ingredients such as bark, compost, perlite and RESiLIENCE®.

FOR EVERY GARDENER
The enthusiast gardener, the hobbyist and the weekend gardener will all find products to suit their plants, projects and lifestyle.

Count on Sun Gro's **Grower Specialists**

to provide expert scientific technical insights and solutions

We provide optimal analytical services to meet our customers' growing parameters, maximizing higher yields and improved crop time supported by our best-fit greenhouse and nursery mixes.

This includes:

- Water Analysis
- Growing Media Analysis
- Plant Tissue Analysis
- Fertilizer Analysis

Our Grower Specialist team will help you:

- Choose the right products and formulations for your needs
- Answer technical questions
- Interpret test results
- And improve your growing operations

What's in the Mix

We all know the importance of using superior professional growing mixes to get the best results. It's critical in the plants you sell—and it's equally critical that you help your customers in selecting plants grown in superior mixes so they can grow vigorous gardens. And become repeat customers.

Sun Gro professional and retail products are made with premium ingredients and meet the highest quality standards.

The major role of a growing mix is to support plants, while holding water, air, and nutrients to promote vigorous growth. The following is a brief overview of each of the quality components Sun Gro may use in our mix formulations.

'Natural' Products

Components such as perlite, gypsum, limestone and RESiLIENCE® silicon are defined as 'natural' which means they are not carbon based but are obtained from natural deposits and processed without the use of synthetic chemicals. These materials are mined, ground up and screened, and expanded in the case of perlite.

'Organic' Products

Organic products are defined by Sun Gro as ingredients that are carbon based, were once alive and are without the addition of synthetic chemicals. Some examples are peat moss, bark, organic fertilizers and organic wetting agents.

gro facts

Sphagnum Peat Moss

What is it? Sphagnum peat moss for growing media comes from the non-living, fibrous sphagnum moss that has partially decomposed in a bog. It's light and spongy and crumbles into small clumps.

What does it do? Peat moss has a remarkable ability to efficiently hold water and nutrients that may otherwise leach out of the soil. It's nature's best all-purpose soil conditioner, which is why Sun Gro adds it to all key professional and retail mixes.

Coir

What is it? Coir is a blend of short fiber and pith left after coconut fiber is extracted from coconut husks.

What does it do? Coir adds bulk and texture to potting mixes. The short fibers and sponge like pith can provide aeration and water holding in mix.

Perlite

What is it? Perlite is derived from crushed volcanic rock, which is expanded (popped) in a furnace. Perlite particles are lightweight, roundish and white.

What does it do? Perlite is a natural additive for growing media used to aerate mixes.

Bark

What is it? Composted bark comes from the forest product industry. The bark is shredded or chipped and then composted to make it a higher value mix component.

What does it do? When added to growing mix, composted bark increases air capacity. Its unique particle size and shape allows air to circulate through the soil, improving oxygen availability to plant roots.

Biochar

What is it? 100% natural, renewable forest products including sawmill and lumber remnants that are typically burned.

What does it do? Sustainable alternative aggregates to optimize aeration and drainage.

Earthworm Castings

What is it? Earthworm castings (vermicastings) are the organic waste products from earthworms. Earthworms consume organic matter, and their castings are collected for soil enrichment.

What does it do? Castings from earthworms are nutrient rich, biologically active, and used to enrich mixes and garden soils for improved plant performance.

Compost

What is it? Compost is decomposed organic material.

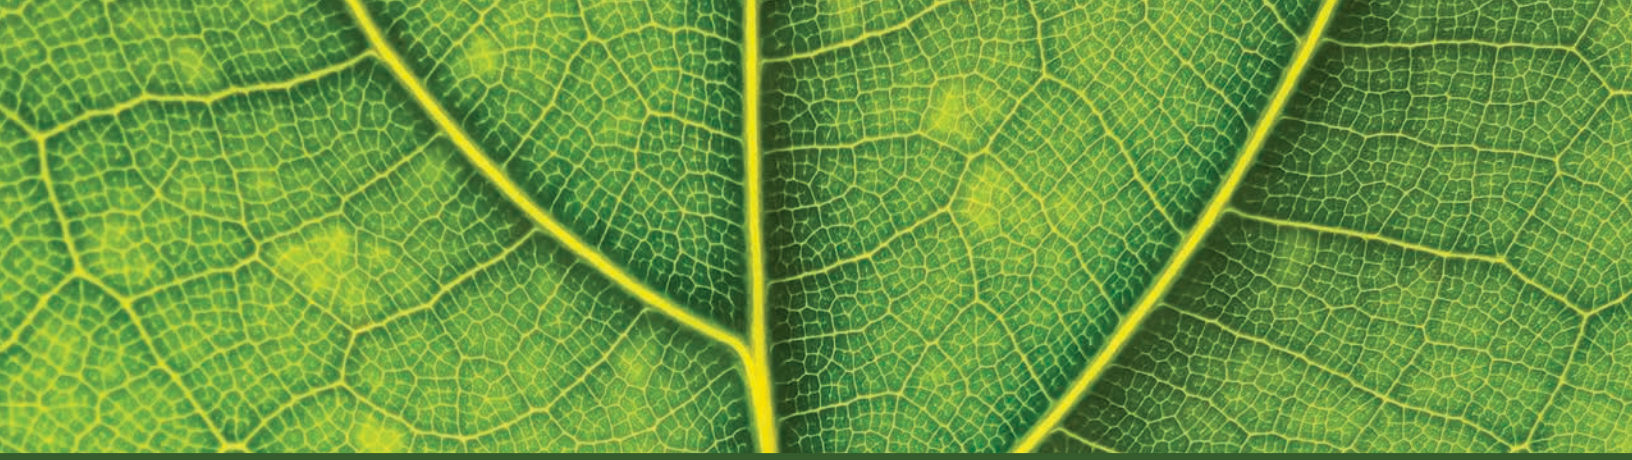

What does it do? Compost is added to mixes to provide natural, stabilized organic matter. It also has excellent water-holding ability.

RESiLIENCE®

What is it? Silicon is an abundant element naturally found in the earth's crust where surface soils exists.

What does it do? RESiLIENCE® – the silicon advantage: Improves growth by providing more resistance to abiotic stress such as wilting, heavy metal toxicity and salt stress.

It's *already* in the mix™

RESiLIENCE® the silicon advantage: Improves growth by providing more resistance to abiotic stress such as wilting, heavy metal toxicity and salt stress.

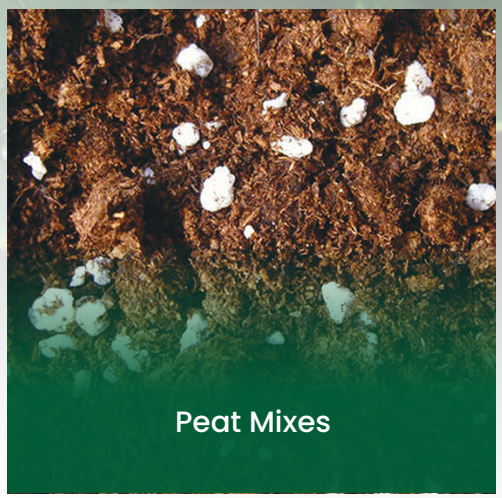

*Results will vary by plant type and grower practices

BIOCHAR
BLACK BEAR®
GROWING MIX

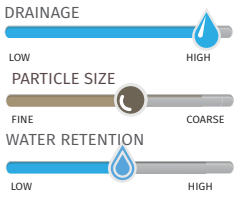

Sunshine® Black Bear® #4

SKU: 132004

Recommended where high air capacity and fast drainage are needed: during winter months, with water- and salt-sensitive crops or where frequent leaching is required.

Contains: Canadian sphagnum peat moss, wood biochar, dolomite lime, wetting agent, calcium silicate

Available sizes: SunTower 110 cu ft (1/pallet), 3.8 cu ft (30/pallet)

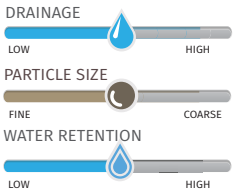

Sunshine® Black Bear® #15

SKU: 132015

Recommended for the production of a wide variety of flats, potted plants and hanging baskets. It is also suitable for rooting of cuttings.

Contains: Canadian sphagnum peat moss, wood biochar, dolomite lime, wetting agent, calcium silicate

Available sizes: SunTower 110 cu ft (1/pallet), 3.8 cu ft (30/pallet)

Peat-Perlite Mixes

Sunshine® products are produced under the industry's highest quality standards and designed to meet the unique needs of your crops while fitting into the flow of your operations. We offer these in either compressed or loosefill packaging in a variety of sizes, from the easy-to-handle 3.8 cubic foot bale to the economy-sized Big Shot or SunTower.

SiLICON RESiLIENCE® ENRICHED
It's already in the mix™

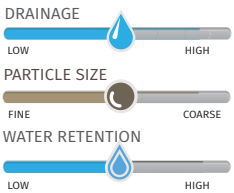

Sunshine® Mix #1

SKU: 5101

An all-purpose lightweight growing mix, our most versatile peat-based formulation for expert growers. It is used for a wide variety of crops, from cuttings to finished product.

Contains: Canadian sphagnum peat moss, perlite, dolomite lime, wetting agent, calcium silicate

Available sizes: SunTower 110 cu ft (1/pallet), Big Shot 55 cu ft (2/pallet). 3.8 cu ft (30/pallet), 2.8 cu ft loosefill (51-54/pallet

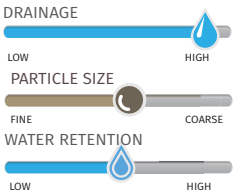

Sunshine® Mix #4

SKU: 1341

Recommended where high air capacity and fast drainage are needed during winter months, with water- and salt-sensitive crops or where frequent leaching is required.

Contains: Canadian sphagnum peat moss, perlite, dolomite lime, wetting agent, calcium silicate

Available sizes: SunTower 110 cu ft (1/pallet), Big Shot 55 cu ft (2/pallet), 3.8 cu ft (30/pallet), 2.8 cu ft loosefill (51-54/pallet)

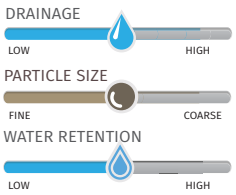

Sunshine® Mix #15

SKU: 5104

Recommended for the production of a wide variety of flats, potted plants and hanging baskets. It is also suitable for rooting of cuttings.

Contains: Canadian sphagnum peat moss, perlite, dolomite lime, wetting agent, calcium silicate

Available sizes: SunTower 110 cu ft t(1/pallet), Big Shot 55 cu ft (2/pallet), 3.8 cu ft (30/pallet), 2.8 cu ft loosefill (51-54/pallet)

SunTower®

SunTower brings a whole new dimension to compressed growing media. It's a 110-cu-ft compressed bale that combines convenience and economic savings, transports easily and can be stored outdoors.

- Reduces packaging waste
- Improves your efficiency
- Saves time in unloading
- 22-24 SunTowers per load
- Equivalent to more than 28-3.8 cu ft bales
- Now available everywhere!

Big Shot®

Our 55-cu-ft compressed Big Shot® bale lends itself to the most efficient mechanized handling available. This means less handling and lower packaging disposal costs. Big Shot® is available in a "cube" format or with a lifting panel.*†

Canadian Sphagnum Peat Moss

Our select line of Canadian sphagnum peat moss is 100% organic and Veriflora® Certified. The high water holding capacity and excellent aeration makes our peat moss the choice for growers who mix their own or other professional uses.

products available OMRI LISTED

CSPMA

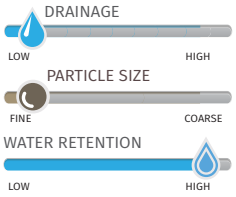

Grower Grade Green

SKU: 401

A screened, high quality, professional peat. It has short fibres with few or no sticks, which produces a fine texture with good water retention. This peat is excellent for seedling or plug production. Also, it is often used in golf course construction.

Contains: Canadian sphagnum peat moss

Available sizes: SunTower 110 cu ft (1/pallet)
Big Shot 55 cu ft (2/pallet) 3.8 cu ft bale (30/pallet)

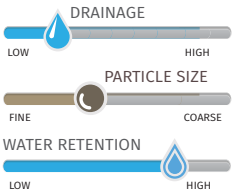

Grower Grade Orange

SKU: 402

A screened, high-quality, professional peat with a medium texture, few sticks and a rich brown colour. It holds water and nutrients well, making them available for later plant uptake. Excellent for cutting propagation and large plug production, as well as vegetable, flowering plant and mushroom production.

Contains: Canadian sphagnum peat moss

Available sizes: SunTower 110 cu ft (1/pallet),
Big Shot 55 cu ft (2/pallet), 3.8 cu ft bale (30/pallet)

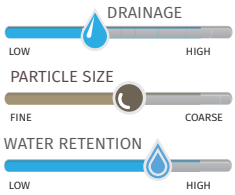

Grower Grade White

SKU: 403

A high-quality, fibrous peat with a coarse texture and light colour. It has a perfect balance of drainage, water retention and air space, which makes it excellent for vegetable, flowering plant and nursery production in large pots and hanging baskets.

Contains: Canadian sphagnum peat moss

Available sizes: SunTower 110 cu ft (1/pallet),
Big Shot 55 cu ft (2/pallet). 3.8 cu ft (30/pallet)

Helping Canadians Create **Beautiful and Vigorous Gardens**

Sun Gro offers several IGC-oriented brands, which are held to the high industry standards of its professional lines. These include well known industry names like **Black Gold®, Grower's Gold®, Sunshine®** and **Sunshine® Mix #4**.

Each brand has a distinct set of characteristics that sets it apart from the rest; among them you will find a wide array of potting, specialty mixes and garden amendments.

Sun Gro's Canadian production facilities are Veriflora® Certified for sustainability and as a founding member of the Canadian Sphagnum Peat Moss Association, Sun Gro practices sustainable peatland management.

BLACK GOLD® ALL THE RICHES OF THE EARTH®

GROWERS GOLD

SUNSHINE® MIX #4 Consistent Cultivation Mixes for Extreme Performance

Sunshine® The Professional Growers' Brand

potting mixes | garden amendments

Black Gold® is one of the most successful garden centre brands in the US - offering quality soils, amendments and fertilizers since 1983. It has become the preferred brand of choice among organic gardening enthusiasts – those that expect the best quality and results.

All Black Gold Mixes are made to the same exacting standards as the Sun Gro professional lines and formulated with the highest quality ingredients by professional horticulturists.

Retailers can sell Black Gold mixes with confidence knowing that the finest ingredients and formulations have been developed to ensure maximum results for their customers.

Homeowners will be delighted with the high quality and exceptional value of Black Gold. Whether it's flower or vegetable gardens or containers, Black Gold creates gardening success.
